

Blackberry

Blackberry Devices

The BlackBerry solution consists of smartphones integrated with software that enables access to a variety of data and communication services.

A BlackBerry smartphone gives access to email, phone, maps, organizer, applications, games, the Internet and more. Some smartphones include a multimedia player and/or camera so you have everything you need in one device.

The BlackBerry solution supports leading enterprise email platforms and can be customized to meet the needs of one person or an entire enterprise, to any scale, in any industry.

The BlackBerry platform provides all of the software tools that you need to allow your mobile workforce to seamlessly access your email and enterprise applications and services. Whether a large enterprise wants to connect its mobile users with internal applications or a small business wants to access all of its email addresses from one smartphone, BlackBerry software can make it happen.

Blackberry Internet Service (BIS)

BIS is the out-of-the-box service that comes with every BlackBerry smartphone. It is the easiest, most affordable way for individuals or small businesses to start using BlackBerry smartphones. BIS lets you receive your email effortlessly because messages are automatically pushed to your device. With BIS you can:

- Access up to 10 work and personal email accounts
- Browse websites and instant message on your BlackBerry smartphone
- Stay organized with access to your latest calendar, address book, task and memo pad information and easily import the contacts from your existing desktop organizer software to your BlackBerry smartphone.

Blackberry Enterprise Server (BES)

BES integrates your organization's BlackBerry smartphones with your existing enterprise systems, securely extending wireless communications and corporate data to mobile users.

BES provides push-based access to email; calendar, contacts, tasks and notes; instant messaging; web-based applications and services and enterprise applications.

Mobile workers who want a high level of connectivity for their personal or business activity will want to take a look at the BlackBerry Internet Service for an easy-to-use, low overhead solution. Larger corporations looking to connect their mobile users to enterprise applications should examine the BlackBerry Enterprise Solution.
